Celebration of Safe Food

ORGANIC RICE MELA

*Our Food * Our Health * Our Culture*

Since a few decades, we have been eating food that is mostly laced with pesticides and other chemicals used during processing. This has made Diabetes, Kidney stones, Heart diseases, Cancer and so many other diseases common among us.

Thanal and the Save our Rice Campaign is now bringing to this city a chance to access safe food. Our most important staple food is Rice. And Rice is one crop that uses the largest quantity of pesticides in India, most of them banned in other countries.

The Organic Rice Mela brings to you not only Rice, that is safe to eat, but also Rice that is nutritious, healthy and diverse. It has in its display and sales Organic Rice, Red unpolished / semi polished rice, Rice from a range of traditional varieties, Medicinal Rice, Scented Rice, Anti-diabetic Rice etc.

Exhibition and Sale
