## INTRODUCTION

Save Our Rice Campaign aims to build a movement towards achieving food security and sovereignty, reviving rice culture and sustaining rice ecosystems. Save Our Rice attempts to sustain rice by creating linkage between different sectors, developing capacities to address local/regional concerns, building alternatives models for sustainable ecological rice cultivation and developing a platform of people with rice culture as a common concern. The campaign was launched in 2004 in the Second International Year of Rice in Kumbalangi, Keralam. The Campaign is coordinated by Thanal and CREATE. The Campaign is active in four states- Tamilnadu, Kerala, Karnataka and West Bengal, where it is coordinated by partners in those States. The major campaign objectives are

- ❑ Conserving Rice Ecosystems
- ❑ Sustaining Rice Culture and Diversity
- ❑ Protecting Traditional Wisdom
- ❑ Preventing GMOs and Toxics
- ❑ Ensuring Safe and Nutritious Food
